Summary

Looking for a job opportunity to utilize and grow my skills in front-end technologies such as HTML, CSS, JavaScript, Bootstrap, and React.js. I am eager to contribute to real-world projects and learn from experienced developers in a dynamic work environment.

Technical Skills

Languages: HTML, CSS, JavaScript

Libraries/Frameworks: Bootstrap, React.js

State Management: Redux

Tools/Platforms: Git, Github, VS

Projects

E-Commerce Web Application

- Developed a feature-rich e-commerce web application with a responsive and user-friendly interface.
- Utilized React.js for building a dynamic front-end with reusable components and smooth navigation.
- Integrated Redux for efficient state management, ensuring seamless cart and wishlist functionality.
- Implemented RESTful API to fetch product data dynamically and manage orders efficiently.
- Designed a fully responsive UI using Bootstrap and CSS3, optimizing for both mobile and desktop views.
- Enhanced user experience with features like product filtering, sorting, and an intuitive checkout process.
- **Technologies Used:** React.js, Redux, JavaScript, HTML5, CSS3, Bootstrap.

News App using RESTful API

- Developed a fully functional news website using a public news API.
- Utilized React.js for building the front-end, ensuring seamless component-based architecture.
- Integrated RESTful API to fetch real-time news from various sources and display it dynamically.
- Implemented responsive design for mobile and desktop views using CSS3 and Bootstrap.
- Enhanced user experience with sorting, filtering news by categories, and searching headlines.
- **Technologies Used:** React.js, HTML, CSS, JavaScript, NewsAPI, Bootstrap.

Country Info Website using REST Country API

- Built a country information app that fetches details such as name, population, region, flags, and languages.
- Focused on building an intuitive UI with React and styled the app using CSS for responsive layouts.
- Integrated error handling to manage failed API calls and present meaningful messages to users.
- Enabled users to search and explore country information using API calls
- **Technologies Used:** HTML, CSS, JavaScript, REST Countries API.

Education

Maharshi Dayanand University
